

Extension For Magento 2

Testing on Magento 2.1 with Sample Data.
Version 1.0 (23.04.17)

Infinity Scroll

This extension automatically loads the next page of the product page. When the user reaches the end of the list of products, the next page is automatically loaded via AJAX to the end of the list. Expansion easy to install, configure, and operate at 100% of the box with Magento theme 2 by default. Using this extension, you can get a more friendly user interface helps the user to save time and clicks.

If you have a topic other than the default, you will need to copy the files to the default theme in their own folder topic.

Main functions:

- the ability to download the products at the click of a button or automatically;
- preloading products, which increases the speed of your goods;
- It works perfectly with our module QuickView;
- It works fine with relevance sort order;
- It supports a normal search and advanced search.

Installation:

- Copy the folder with the module at the root of your site;
- - run the following command:
 php bin/magento setup:upgrade
 php bin/magento setup:di:compile
 php bin/magento setup:static-content:deploy
 php bin/magento cache:clean
- after they are completed, you should see in the app/etc/config.php this module.

NOTE. If you have another module JS, which adds a certain behavior in the list of products, be sure to use a callback function to add this behavior to the products to be loaded through the Infinite Scroll.

Settings:

For module settings, go to admin -> stores -> configuration -> catalog -> catalog -> Catalog Infinity Scroll

Note: The extension can override the files that you already use. Make sure that there are no conflicts with your modules before using this module. The module has been tested on Magento 2.1 with Sample Data.
